# Introduction

In a world full of deadlines and special moments, we all need a smart way to stay organized and never miss what matters most.

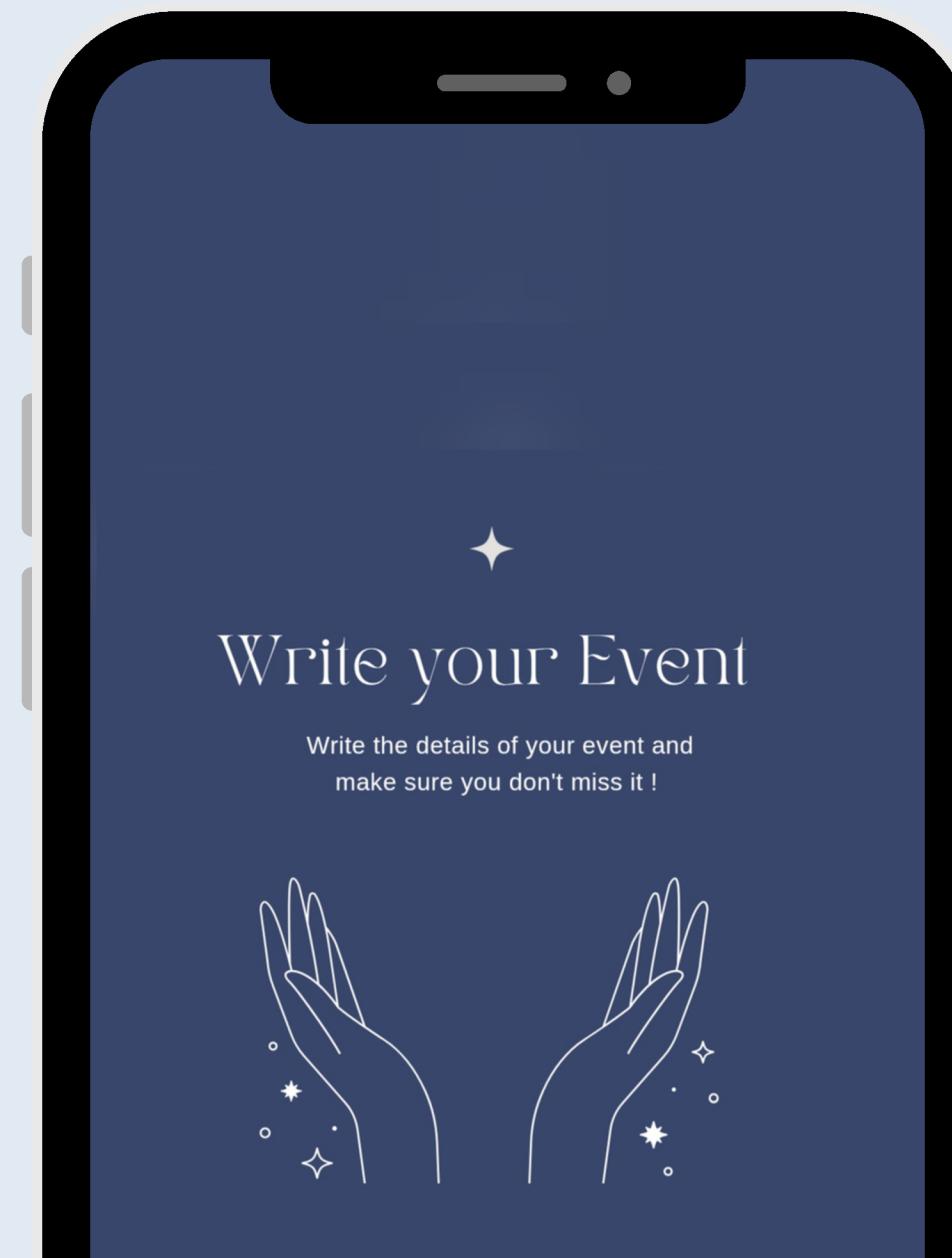

Event Mate is your personal assistant for tracking upcoming events from project deadlines and birthdays to personal goals.

Our goal is simple:  
Never miss an important moment again.

# Main Features & Solutions

**1**

**Easy Event Creation**  
Add events with title, date, and image in just a few taps.

**2**

**Real-Time Countdown**  
Get live countdowns for all your upcoming events, keeping you informed at all times.

**3**

**Smart Notifications**  
Receive customizable reminders to ensure you never forget an important event.

**4**

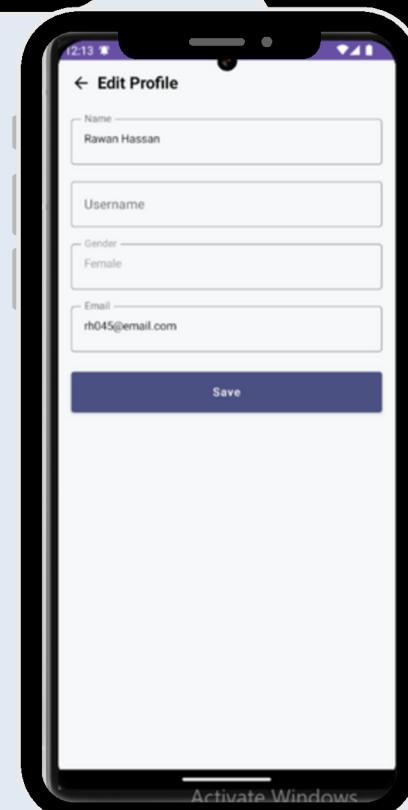

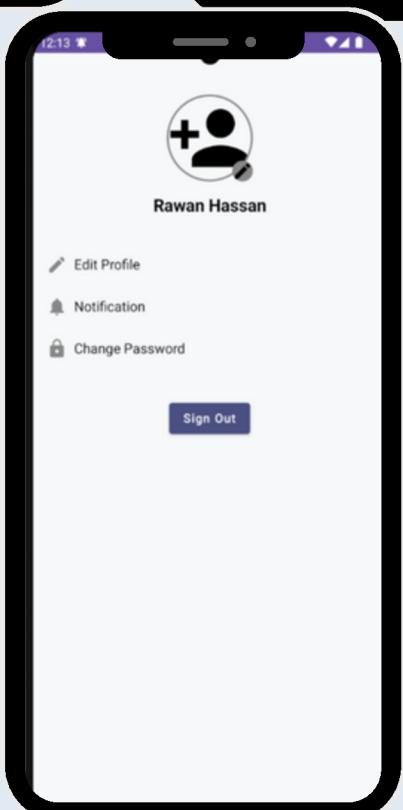

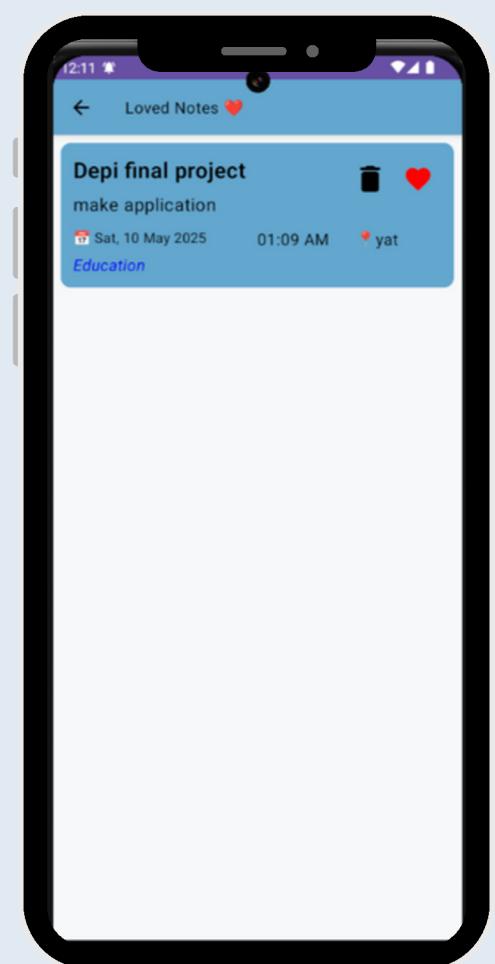

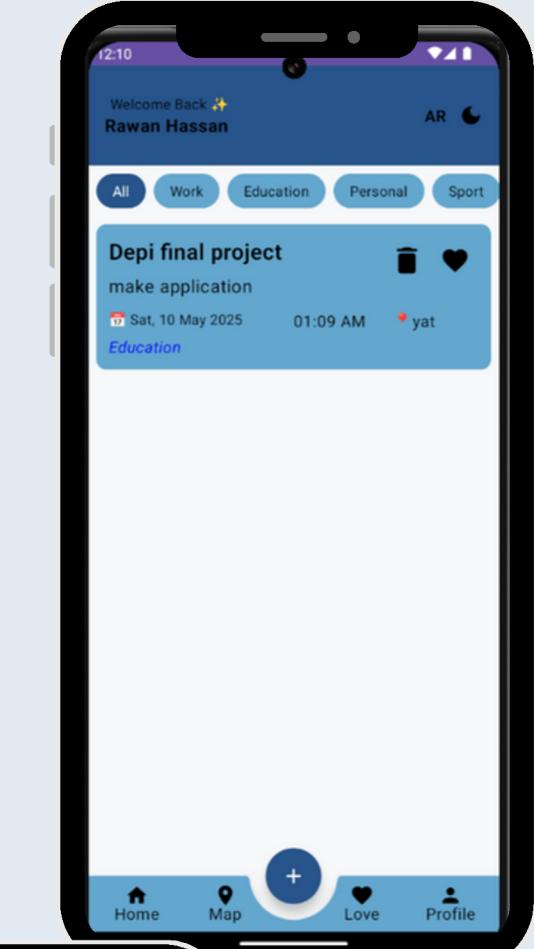

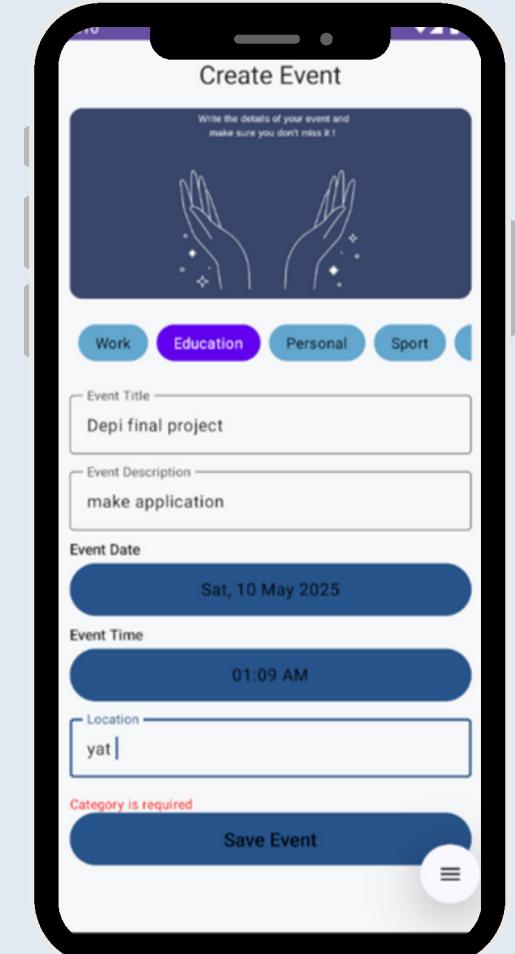

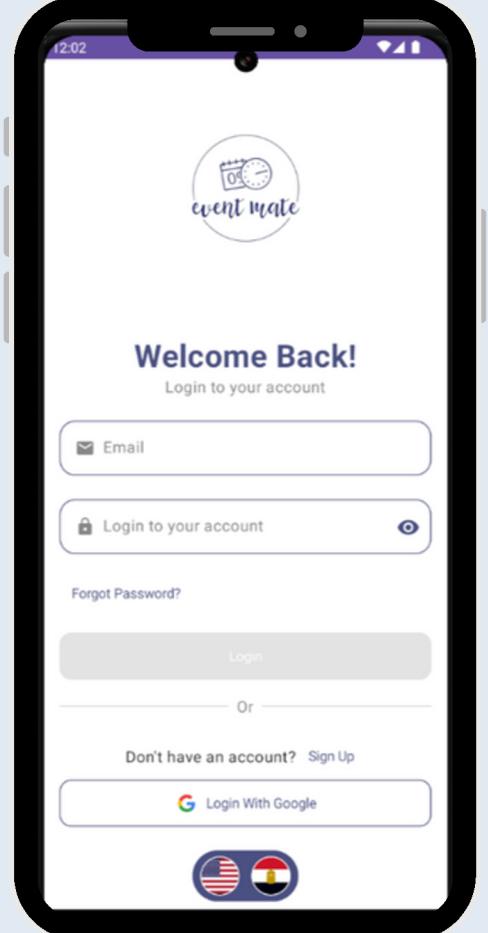

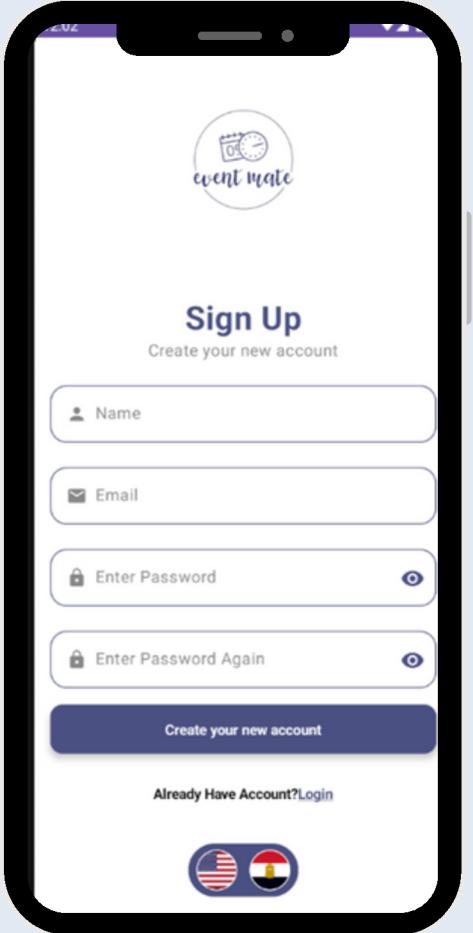

**Offline Mode**  
View and manage events without an internet connection, thanks to local storage using Room Database.

# Tech Stack

- 1 Kotlin**
  - 2 Jetpack Compose**
  - 3 Room Database**
  - 4 WorkManager**
  - 5 MVVM Architecture**
- Primary programming language for Android development.
- Modern UI toolkit used to build declarative interfaces.
- Local database solution for offline data storage and event management.
- For scheduling reliable notifications and reminders.
- Ensures a clean code structure and better separation of concerns.

# App Screens

# Benefits for Users

- Peace of Mind

No more last-minute rushes — Event Mate keeps you ahead of every important moment with timely reminders.

- Personal Timekeeper

Your events come to life with elegant countdowns that keep you emotionally connected and practically prepared.

- Freedom to Plan Anytime, Anywhere

Whether you're online or off the grid, your events are always with you — no internet, no problem.
